

Recommended Vaccines for Children from Birth to 6 Years

"Recommended Vaccines for Children from Birth to 6 Years" was created and translated Sept 12, 2024 by [M-HEAL](#). [English]

Child's Name:
Child's Date of Birth:

This document is based on U.S. Centers for Disease Control and Prevention recommendations as of Sept 12, 2024.

If your child has not received all the recommended vaccines on time, your doctor will make a different plan to ensure they get caught up. If your child will be traveling outside the U.S. or has a health condition that can weaken the immune system, ask their doctor whether any early or additional vaccines are needed. Some brands of RV and Hib do not require a dose at age 6 months. *The first time your child receives yearly vaccines (like Flu), they may need 2 doses.

	Birth	1 Month	2 Months	4 Months	6 Months	12 Months	15 Months	18 Months	19-23 Months	2-3 Years	4-6 Years	
Hepatitis B (HepB)	<input type="checkbox"/> HepB	<input type="checkbox"/> HepB			<input type="checkbox"/> HepB
